DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25, drawn to a solid controlled release formulation.

Group II, claim(s) 26-30, drawn to a process for producing the solid controlled release formulation.

These inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The inventions are all directed to 'a solid controlled release formulation with a core of venlafaxine, polyvinyl pyrrolidone and a hydrophilic polymer and a polymeric coating of a water high permeable polymer and a water low permeable polymer', which is not special technical feature, since the prior art (US 2003/0059446) teaches a delayed or sustained release tablet comprising a core with an active (venlafaxine) and gelling agents, excipients, and a coating consisting essentially of a water insoluble, impermeable film-forming polymer, a plasticizer and a water soluble polymer (abstract, [0001], claims 1 and 17). US 2003/0059446 teaches that known gelling agents behave like a hydrophilic matrix and include PVP and HPMC [0013] and teaches various coating polymers [0023].
